

Frequently Asked Questions:

Have there been any independent third-party reviews of the Elzetta ZFH1500? Yes. Independent reviews may be seen at the following websites.

www.officer.com

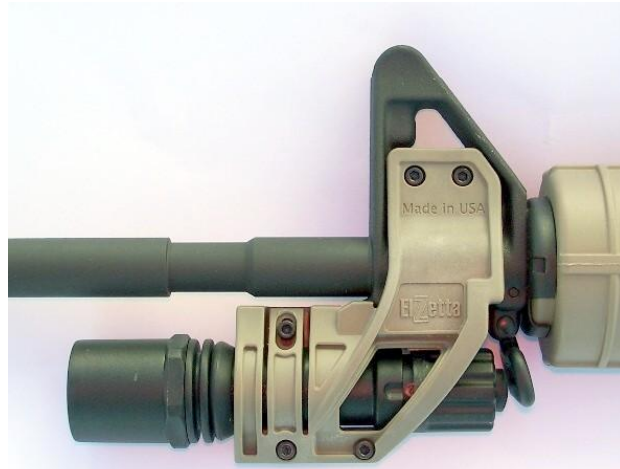

www.borelliconsulting.com

<http://hunting.about.com>

What flashlights will work with Elzetta ZFH1500?

Every Elzetta ZFH1500 comes with Sizing Adapters, giving the Flashlight Holder the ability to mount flashlights from 0.7 to 1.1 inches in diameter (18 to 27 mm). This includes such popular flashlights as the Mini-MagLite®,

PentagonLight®, Inova®, Streamlight®, Pelican®, Laser Devices®, and many SureFire® models.

What advantage does the Quick-Release Thumb Screw offer? The Quick-Release Thumb Screw allows flashlights to be installed and removed rapidly and without tools. It also provides a more robust clamping mechanism while retaining the nut on the device. The Thumb Screw Model is highly recommended.

Will the Elzetta ZFH1500 fit rifles equipped with a bayonet lug? Yes, the ZFH1500 is designed to fit around the [standard bayonet lug](#). In fact, the bayonet lug adds strength to the flashlight holder assembly.

Will the Elzetta ZFH1500 work with a side-mounted front sling swivel? The Elzetta ZFH1500 is not compatible with standard side-mounted front sling swivels. However, a popular way to achieve a similar sling position is to use the [Elzetta ZPR1500 Picatinny Rail Kit in conjunction with a rail-mounted sling adapter](#).

What material is the ZFH1500 Flashlight Holder made from? The Elzetta ZFH1500 is made from a glass-filled polymer.

What are the advantages of this material? This glass-filled polymer provides outstanding durability, impact resistance, scratch resistant, and light weight. It also withstands high temperatures, vibration, and most chemicals.

How much does the Elzetta ZFH1500 weigh? The Flashlight Holder with hardware weighs only 2.8 oz (79 g).

Will attaching a sling on the front sling swivel interfere with the use of the ZFH1500? No, Elzetta designed the ZFH1500 to work in various configurations. When the flashlight is [mounted rearward \(with the tailcap exposed\)](#), the sling swivel (with or without a sling attached) will activate the push-button switch of the flashlight. When the flashlight is [mounted with the tailcap recessed into the ZFH1500 body](#), the push-button switch is protected from the sling swivel while the tailcap of the flashlight is still accessible through the skeleton hole in the ZFH1500 body.

Will the Elzetta ZFH1500 work with a heavy barrel (HBAR)? Yes, the ZFH1500 was designed around the standard HBAR and will work with any barrel that has a diameter of 0.75 inch (19mm) or less at the front sight base.

Will my AR15 fit in its storage case when fitted with an Elzetta ZFH1500 Flashlight Holder? Yes, the ZFH1500's center line mounting position preserves the slim profile of the AR15 rifle, allowing [storage in most gun cases](#).

Will the Elzetta ZFH1500 fit an Airsoft Rifle? Yes, the ZFH1500 will fit many [Airsoft AR15/M4 replica rifles](#). Some may require minor modification.

Where is the Elzetta ZFH1500 made? All Elzetta products, including the ZFH1500, are designed, engineered, and manufactured in the USA using American tooling and American made materials.
